Washer Disinfectors for Instruments & Bedpans

www.tbtmedical.com

PLUSHER series instrument washer disinfectors are designed to fit in small spaces in order to provide wider space for other equipment in C.S.S.D (Central Sterile Supply Depot) or laboratory. Increased capacity enables flexibility and reduces necessity for capital equipment investments. Simple design provides easy service for engineers while guaranteeing problem free workflow for operators.

Monitoring of cycle and device status is essential in order to ensure operational ease. For that reason, as a TBT principle, a graphic flat screen is placed on both sides in pass-through models. Complete set of accessories for various types of instruments enhances flexibility for each unit. It is possible to reach higher throughput levels by JET modification available for all instrument washer disinfector.

### **Functionality and ease**

PLUSHER series of instrument washer disinfectors may include several features to increase functionality and operational ease in daily work flow:

Save & Safe

system available

**Ergonomics** 

chamber

removable dip tray

in single or pass-through

HEPA H14 filter for drying and ventilation

Energy optimization by steam-electric hybrid heating

Air and water warming by condensed steam to save

Optimized pump capacities to reduce consumption

• 4 x 5L can capacity drawer with lock & easy cleaning

• Stainless steel stand for heightening PLUSHER WDC 8

• Easy to open manual door or vertical sliding door available

Steam condensers to prevent steam coming out from

## **Functional software**

- 9 pre-defined & 11 free customizable cycle capacity for various different types of instruments
- Ability to modify cycle parameters to reach specific goals
- Self diagnosis with animations
- Monitoring all washing parameters in order to ensure real validation

# Intelligent design

- Spray arm monitoring which stops cycle in case of an abnormality
- Trolley recognition system to eliminate risk of running improper cycles
- Conductivity probe for optimum washing performance
- T.E.S. (Total Emptiness System) for draining all left over water at pump

# Shorter Cyle Times

- Increased speed in cycle times
- Cycle times reduced up to 50%
- Standard pre-heating tank for hot water connection
- Optional pre-heating tank for demi-water connection

## Easy workflow with optional features and customizable accessories

All PLUSHER series instrument washer disinfectors may be equipped with various kinds of accessories and optional features in order to support workflow, which some are listed below:

- Integrated water softener Instrument trolleys with 2, 3, 4, 5 or 6 levels
- M.I.S. trolleys Demineralized water connection
- Additional peristaltic pumps with flow meter (2 already included) Anesthesia trolleys
- Hybrid heating system, steam electric
- Printer on clean/dirty side
- Trolley recognition system
- Spray arm monitoring
- Conductivity sensor
- LED light inside chamber
- Wall drain system
- Total Emptiness System (T.E.S.)

#### Simplicity at peak for sluice rooms

PLUSHER WDB DS and PLUSHER WDB DC bedpan washer disinfectors are designed to serve as separate units or together with PLUSHINE series stainless steel furniture in sluice rooms. Simple operation process with warnings on digital screen and controls through keypad allows users to complete every task in a simple manner. Compact design enables PLUSHER series to fit separately or as a sluice room solution even in narrow spaces or limited areas near wards. High levels of disinfection through 10 nozzles and 3 pre-set programs for solid, liquid and tough wastes for are available. Safety is kept in mind while designing and several features like drain clog safety, self disinfection system or door safety has already been covered.
